

Mel Gibson on quantum computing and Artificial Intelligence trading systems.

From: https://bookista-com.myshopify.com/tools/folder/mel/index.php?gclid=EAIaIQobChMI5tehgs6k4wIVBXqPCh2BNQohEAEYASAAEgIM3PD_BwE

SPECIAL REPORT: Mel Gibson's Latest Rant Live On Air Nearly Shuts Down The Show - "The Banks Are The Devil - Screw Them!" The Star Screams.

Australia citizens using this artificial Intelligence Micro Trader Mel talks about - but is it legitimate? PM Morrison is said to have reached out to Gibson's office, as the star Rants of corruption by big banks and high ranking Gov officials.

By [Rose Hill](#) Monday, July 8, 2019

Australian hollywood A Lister and philanthropist Mel Gibson has made a name for himself as a brash straight-talker who doesn't mind being honest about how he veivs the world and the people that run it. Last week, he appeared on The Project and announced a new tech breakthrough in Quantum computing and Artifical Intelligence that is being used by top trading systems, which he discovered when searching for financing for his latest film. Gibson says using "AI" can transform anyone into a literal millionaire within a years time, and even quicker if you have money to back the trades. The famous film-maker urged everyone in Australia to jump on this amazing opportunity before the big banks shut it down for good or bring in as he calls it "soul crushing regulation."

Sure enough, minutes after the interview was over, National Australia Bank called to stop Gibson's interview from being aired- but it was already too late.

Here's exactly what happened:

The Project co-host Waleed Aly invited Mel on the show to promote his latest movie and the Australian entrepreneur and star broke off into one of his epic rants live on air:

"The truth is Waleed that because of certain backstabbing peice's of SHIT I was blackballed in my industry that I have been working in for over 30 years. I couldnt get full financing for my projects that had been in the works for years. I asked my team to bring me anything out of the box so we could look at financing our projects in house. The banks are the Goddamn Devil! This is a fact. They do not want the average person to be informed, empowered, or wealthy. The system is not setup for everyone to be rich. Its just a sad fact. What's made me successful is jumping into new opportunities head first with no fear, no hesitation. My team what they found was truely a miracle, and as we got involved with it I realized how much the banks truely do not want the average person to be wealthy. I had to jump through a million hoops in order to find this Quantum computing which ANYONE can take advantage of. This new artifical intelligence is a [Quantum Computing Program](#) and it focuses on small micro trades. It's the single biggest opportunity I've seen in my entire lifetime for the regular person to build a small fortune...fast. I urge everyone to check this out before the banks shut it down for good. Because as sure as I'm sitting here breathing THEY WILL SHUT THIS DOWN as soon as they can. They are the living DEVIL I promise you. The day I tried to store over 10 million dollars in digital currency that I made from this system within a week was a nightmare. The Bank freaked out. You would have thought I robbed my own account. Then a bunch of white men in suits walked into the room to tell me how risky "AI" trading systems were and digital asset classes along with them. They said I needed to get out of that space immediately even threatening to close my accounts. I was shocked. I couldn't believe the fear they were trying to instill in me and I had been with National Bank for 20 years."

- [The Project co-host was left in disbelief as Gibson pulled out his phone and showed viewers how much money he's making through this new money-making program that now has everyone in Australia whispering and the Prime Minister under pressure to curtail it. Waleed Aly remarked that he had "heard about Quantum Computing and artifical Intelligence and the huge amount of money that can be made with it by trading digital products but I've never bought any yet. I didn't even know where to start really. "](#)

The segment ran out of time before Gibson could elaborate, so ABC got an exclusive interview with the man himself to learn more about this controversial opportunity and if anyone could really use it not just the 1% and their team of expert traders.

Waleed Invited PM Morrison on The Project the following week to answer the corruption charges that Gibson had leveled against the banks and top government officials. (Image: Daily Mirror)

ABC NEWS EXCLUSIVE WITH MEL GIBSON

"You may have heard about this new Quantum Computing and investment platform [its automatic artificial intelligence learning and focuses on MicroTrading digital currency like Bitcoin](#) and it's helping regular people in Australia, Asia and Europe build fortunes overnight. I know, You may be skeptical because it sounds too good to be true."

Gibson continues:

"I get that because I thought the same thing when my financing team told me about it, I said this is horseshit through and through. But after seeing with my own eyes how much money they made in the test run, I jumped in head first and contacted the company to invest large sums and find out more about the tech behind the system. This program is the very reason I was able to fund 50% of the budget for my last film myself. I still can't believe it, everyday I wake up thinking is this real life?"

- ["I'm glad I tried it because it was some of the biggest and easiest money I've ever made. I'm talking tens of thousands of AUD a day on autopilot daily. it's literally the fastest way to make a windfall of cash I've ever seen besides winning the lottery, and it's not going to last for much longer when more and more people find out about it. Then the banks will shut it down for good, because they can't control it. This is bigger then gold. Worth more and they are scared for their bloodsucking lives." - Mel Gibson](#)

WHAT EXACTLY IS QUANTUM COMPUTING AND ARTIFICIAL INTELLIGENCE?

The idea behind Micro Trading is straightforward:To allow the average person to cash in on the cryptocurrency boom which is still the most lucrative investment of the 21st century, despite what most people think.

Although the Bitcoin price has dropped from it's all time high of \$20,000 per Bitcoin, traders are still making a killing. Why? Because the price of Bitcoin and cryptocurrency's are volatile. They move daily up and down. There are thousands of other cryptocurrencies besides Bitcoin that are being traded for huge profits on a daily basis. Some of these cryptocurrencies include Ripple, Ethereum, Monero, Zcash and Ripple and they are still making returns of over 10,000% and higher for ordinary people in Australia.

[Quantum computing and AutoTrading](#) lets you profit from all of these cryptocurrencies, even in a bear market. It uses huge computing power and artificial intelligence (AI) that learns what the market is going to do given certain key statistics to automatically handle long and short selling for you so you can make money around the clock, even while you sleep.

This Software is backed by some of the smartest tech minds to ever exist. Richard Branson, Elon Musk and Bill Gates are all huge investors in the Quantum computing space.

These tech geniuses have built multi-billion companies on solving complex issues like online payments, computing, and transportation. Now, they're tackling on the global problem of wealth inequality by letting anyone - no matter how rich or poor they are - make enough money to enjoy a happy and fulfilling life.

THE LUCRATIVE MONEY-MAKING SECRET BIG BANKS DON'T WANT YOU TO KNOW

Mel Gibson goes on,

"We're seeing hard economic times, and this is the solution people have been waiting for. Never in history have we had such an [amazing opportunity](#) that ordinary people can easily take advantage of to generate tremendous wealth in such a short time.

Some people are hesitant to try this because it's so different. And that's because the big banks are trying to cover this up! The big banks are actively creating propaganda and calling cryptocurrencies and platform that use Quantum Computing to trade a scam. Why? They are worried their corporate profits will shrink once their customers know how to create massive wealth themselves and because they CAN'T CONTROL the flow of the money. It's all about control.

The truth is, artificial Intelligence is the revolution of our lifetime and anyone who does not jump on this opportunity is missing out. I've already received angry calls and threats from big financial corporations because I'm bring this technology to people's attention. But screw them! People in Australia are already starting to know the truth and it's only a matter of time before more and more do.

I'm sharing this because I've received hundreds of emails from people thanking me for sharing this secret and I will continue to share this message every chance I get. Or until the big banks [shut down this microtrading system](#) for good. But in the mean time I want as many people to get rich from this as possible, before time runs out. The banks can stick it!

DOES MICRO TRADING REALLY WORK? WE TEST IT OURSELVES TO FIND OUT

Our senior editors wouldn't let us to publish the interview with Mel Gibson until we verified that Automatic Trading is a legitimate make-money-from-home opportunity. Our corporate leadership did not want us releasing any information that could potentially cause citizens of Australia to lose their hard-earned money.

So our editorial team tested [Auto Trader A Certified Trading Rep](#) that Gibson set us up with to make sure it actually works like the superstar described. One of our online editors, Zachary Tisdale, volunteered to risk his own money and test out Auto Trader .

Zachary is a 53-year-old father of 2 girls whose wife lost her job last year due to illness. He admitted he was struggling financially and this investment opportunity could be the answer.

Zachary reports:

"At first, when I heard the interview with Gibson , I thought he was joking. Making money from home is only a dream. I decided to try it anyway given my financial circumstances- and for the sake of good journalism.

I watched an [introductory video about the platform](#) and then signed up. The video seemed to be over-promising but I put my skepticism aside. Within a few hours, I received a call from my personal account rep from their certified trading partner. He answered all questions and doubts I had, and assured me I was going to make money, and he was right.

My personal broker promised that if I lose even a single dime, he would promptly refund my initial deposit, so there was ZERO RISK in trying the platform out. That's how confident he was this was going to change my life! Now that's customer service beyond anything I've seen and no wonder banks are scared.

Once I received access to the platform, I deposited my initial investment which is about what my family spends on junk food every month, so I decided to stop taking us to fast food for a month and no matter what I would be fine. Now we can be healthy, plus have the opportunity to get rich, and worse case I get a refund on my initial deposit so there really was no downside.

The Auto trading system itself uses Quantum Computing and focuses on cryptocurrency micro trades. The software uses advanced AI algorithms and machine learning to predict exactly when cryptocurrencies will go up and down. Then it will automatically buy and sell for you around the clock. Technology has already made our lives easier in every possible way, so why not use it to make more money as well?"

ZACH'S REAL TIME RESULTS WITH THE SYSTEM

"Within 1 hour of depositing \$350 AUD, the software started trading for me. To be honest, I was nervous it would lose all of my money. And sure enough, my first trade was a \$25 loss!"

I felt my throat close up. I thought I had been scammed. I was even ready to call my personal rep and ask for my money back. But then I remembered what he told me earlier on our call: The algorithm is right about 80-82% of the time. You're not going to win EVERY trade, but you'll win enough and be profitable overall.

So I let the software keep trading for me and watched it closely. The next trade was profitable! Only \$19 but it was still something. Then the next trade was \$51 profit. Then \$22 profit, making a total profit of \$67. And this was all under 5 minutes!

Soon I started scooping up cash like ice-cream and I couldn't believe my eyes. Every time I refreshed the screen, my profits grew higher and higher. I felt like I was on drugs because this was such an exciting rush.

Now I know why Mel Gibson is in a good mood all the time. And why the big banks don't want people anywhere near this [wealth loophole](#). By the end of the day, I had made over \$754 in profit AUD, not bad from a starting investment of \$350 AUD! I was so excited I barely got any sleep.

The next day was Tuesday and I had to go back to work. To be honest (and don't tell my boss this), it was hard to focus on my job knowing the [Auto Trader](#) software was making me money on auto pilot.

I snuck out to the bathroom a few times to check my profits, and they kept stacking up (with a small loss here and there). At the end of the day, before I put my kids to sleep, my account balance showed \$1,349.13. That's more than I earn in a WEEK at my regular job!

By the end of the week, I made a total of \$5,349.12 AUD. I withdrew exactly \$4,500 and re-invested the rest. Within 2 days I received my first cheque in the mail- for exactly \$4,500. I couldn't believe this was real life!"

How I easily withdrew my money from my Bitcoin trading account (Image: Daily Mirror)

Zach continues,

"Now, I am consistently making an additional \$700 to \$1,500 per day thanks to [Automatic Bitcoin Trading](#). Now, the money just gets deposited into my bank account every few days. Just a few clicks and I received my funds within 24-48 hours. Everytime the transfer hits my checking account, I have to pinch myself to make sure I wasn't dreaming.

Luckily, I LOVE my job here because I get to bring people important news stories (like this one) otherwise I would have quit by now. I did, however, plan a vacation for my family to Bali Indonesia to celebrate being out of debt and finally having my family's finances back on track!

This wouldn't be possible without Mr. Gibson's generosity and sharing his secret live on television. And I'm happy I took the risk to try crypto trading myself. My wife is happier than ever and my kids' toy cupboard is well stocked.

My co-workers are kicking themselves they didn't sign up two weeks ago like I did. But soon, our entire office signed up (including my boss) and they are calling me a "hero" for trying this."

HOW TO GET STARTED WITH AUTO TRADER (LIMITED SPOTS AVAILABLE)

To get started, you only need your computer, smartphone, or tablet with internet access. You don't need any specific skills other than knowing how to use a computer and browsing the internet. You don't need any technology or cryptocurrency experience because the software and your personal investor [guarantees you make a profit.](#)

Another perk of this program is you get to start when you want. You can make your own schedule-whether that's 5 hours a week or 50 hours a week. Just start the auto-trading software when you wish, and you can pause whenever you want (I don't know why you ever would though).

To save our reader's time and double check the 's functionality, Zachary kindly created a guide to getting started on the system.

HERE'S MY STEP-BY-STEP WALKTHROUGH:

- 1. See if you Qualify For A Free Account by registering with your Information.**
- 2. Deposit The Refundable Minimum To Fund Your Account With Zero Risk**
- 3. Speak with your rep or activate and turn the system to Auto Trade - thats it!**

Note: You can withdraw your profits or initial deposit at ANY time by using the 'Withdraw' button inside the platform

Step 1: Enter Your Details To Sign Up For A Free Account
